Objective

Seeking to obtain a position at Plexxis Software as a Junior Full Stack JavaScript Developer so I can use my knowledge in object-oriented programming, HTML, CSS, C#, JavaScript, database management, and agile development techniques. Committed to making a valuable contribution to Plexxis Software's modernization efforts and always improving my talents in the ever-changing field of software development.

Summary Of Qualifications

- Proficiency with JavaScript, especially a solid understanding of ReactJS gained via coursework and independent study.
 - knowledgeable about HTML and CSS to build responsive and dynamic user experiences. knowledgeable about agile development techniques, guaranteeing effective project completion.
 - knowledge of database management systems, particularly exposure to relational databases like OracleDB, acquired via school projects and independent study.
 - outstanding problem-solving abilities combined with a love of conquering coding difficulties, demonstrated by contributions to open-source projects and personal coding projects.
 - mastery of C#, increasing adaptability in development settings and extending knowledge of .NET frameworks.
 - a foundational knowledge of Java that offers prospects for cross-platform programming projects and more expertise.
-

Technical Skills

- Programming Languages: JavaScript, HTML, CSS, C#, Java, Python, Bash
- Web Development Frameworks: ReactJS, NodeJS
- Database Management Systems: OracleDB, MySQL
- Version Control Systems: Git
- Software Development Methodologies: Agile (Scrum, Kanban)
- Integrated Development Environments (IDEs): Visual Studio Code, IntelliJ IDEA, NetBeans
- Operating Systems: Linux (Ubuntu)
- Scripting: Bash scripting for automation
- Frontend Development Tools: Bootstrap

Education

Computer Programming And Analysis, Advanced Diploma, April 2025

George Brown College, Toronto Ontario

Professional Experience

Restaurant Crew Member, March 2023 Till Now

Burgers And Fries Forever, Toronto Ontario

- **Strong Communication:** Effectively communicate with team members and supervisors to coordinate tasks.
- **Multitasking:** Ability to manage multiple tasks simultaneously, prioritizing effectively to handle various aspects of prepping and making customer orders.
- **Attention to Detail:** Keen eye for detail in both customer orders and code, ensuring accuracy and precision in completing tasks.
